ASSISTANT EDITORS

DR J. C. R. HUNT, DR H. E. HUPPERT, DR D. J. JEFFREY, DR M. E. MCINTYRE

EDITORIAL ASSISTANT

MRS E. BAKER

Authors wishing to have papers published in the *Journal* should communicate them to any editor named above, choosing one in their own country where possible. The submission of two or three copies will expedite the process of assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers. Manuscripts for the printer should by typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in black Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to 50 offprints of a paper in the *Journal* free of charge, and additional offprints can be purchased if ordered in advance.

COPYING

The *Journal* is registered with the Copyright Clearance Center, New York. Organizations in the U.S.A. which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. © law) subject to payment to C.C.C. of the per-copy fee indicated in the code on the first page of the article. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Service, 325 Chestnut Street, Philadelphia, Pennsylvania 19106, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from the Cambridge or New York office of the Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published in six volumes of four parts. Single parts cost £6.50 net (US $16.50 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 90–95, 1979, is £21.00 per volume (US $52.00 in the U.S.A. and Canada) for institutions; £10.50 (US $26.00) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

CONTENTS TO VOLUME 90

Part 1 16 January 1979

Algebraic disturbances in stratified shear flows. G. Chimonas *page* 1

Model studies of the closing behaviour of the aortic valve. A. A. van Steenhoven and M. E. H. van Dongen 21

Radiative interactions in boundary layers. S. P. Venkateshan and K. Krishna Prasad 33

The influence of suction on the structure of turbulence in fully developed pipe flow. M. Schildknecht, J. A. Miller and G. E. A. Meier 67

Vortex breakdown in a rotating cylindrical cavity. J. M. Owen and J. R. Pincombe 109

Small-scale structure of two-dimensional magnetohydrodynamic turbulence. Steven A. Orszag and Cha-Mei Tang 29

Peristaltic transport due to finite amplitude bending and contraction waves. Dennis E. Wilson and Ronald L. Panton 45

On resonant over-reflexion of internal gravity waves from a Helmholtz velocity profile. R. H. J. Grimshaw 161

Third-order approximation to short-crested waves. J. R. C. Hsu, Y. Tsuchiya and R. Silvester 179

A note on the viscous diffusion of rolled vortex sheets. J. P. Guiraud and R. K. Zeytounian 197

Review

One hundred years of Lamb's Hydrodynamics 202

Part 2 29 January 1979

The unsteady pressure field of a ducted impeller. Dac Q. Dang and D. H. Norrie 209

An experimental investigation of natural convection in the melted region around a heated horizontal cylinder. A. G. Bathelt, R. Viskanta and W. Leidenfrost 227

Mechanisms of decay of laminar and turbulent vortices. Makinder S. Uberoi 241

Influence of the amplitude of a solid wavy wall on a turbulent flow. Part 2. Separated flows. Daniel P. Zilker and Thomas J. Hanratty 257

The dynamic effect of flux ropes on Rayleigh–Bénard convection. M. R. E. Proctor and D. J. Galloway 273

Laminar boundary-layer reattachment in supersonic flow. P. G. Daniels 289

High Reynolds number flows in exponential tubes of slow variation. P. G. Daniels and P. M. Eagles *page* 305

Theory and experiments on the control of the stratification in almost enclosed regions. Lars Rahm and Gösta Walin 315

Wave-tank experiments on an immersed parallel-plate duct. G. F. Knott and J. O. Flower 327

A theory for wave-power absorption by two independently oscillating bodies. M. A. Srokosz and D. V. Evans 337

Double boundary layers on an electrically conducting plane surface in a rotating environment. S. S. Chawla 363

Bénard convection in a finite box: secondary and imperfect bifurcations. P. Hall and I. C. Walton 377

Reviews

Environmental aerodynamics, by R. S. Scorer 396

Fluid Mechanics: A Laboratory Course, by M. A. Plint and L. Böswirth 397

Waves in the Ocean, by P. H. LeBlond and L. A. Mysak 398

Part 3 13 February 1979

Turbulent velocity profiles from stability criteria. Willem V. R. Malkus 401

The effects of certain low frequency phenomena on the calibration of hot wires. A. E. Perry, A. J. Smits and M. S. Chong 415

Laminar flow in the entrance region of the smooth pipe. A. K. Mohanty and S. B. L. Asthana 433

The effects of rotation on salt fingers. Raymond W. Schmitt and Richard B. Lambert 449

Numerical solution of wave scattering problems in the parabolic approximation. Sébastien M. Candel 465

On the scaling of stress-driven entrainment experiments. James F. Price 509

Flow structure of the free round turbulent jet in the initial region. L. Bogusławski and Cz. O. Popiel 531

Transition to Mach reflexion of shock waves in steady and pseudosteady flow with and without relaxation. H. G. Hornung, H. Oertel and R. J. Sandeman 541

Note on Gill's solution for free convection in a vertical enclosure. Adrian Bejan 561

The mixing of rain with near-surface water. T. Green and D. F. Houk 569

Theory of premixed-flame propagation in large-scale turbulence.
P. Clavin and F. A. Williams *page* 589

Reviews

Waves in Fluids, by James Lighthill 605

Marine Hydrodynamics, by J. N. Newman 607

Part 4 27 February 1970

Nonlinear thermal convection in anisotropic porous media.
Oddmund Kvernvold and Peder A. Tyvand 609

Swirling water bells. Fritz H. Bark, Hans-Peter Wallin, Marcus G. Gällstedt and L. Peter Kristiansson 625

On the diffusive instability of some steady magnetohydrodynamic flows.
P. H. Roberts and David E. Loper 641

Thermal and magnetically driven convection in a rapidly rotating fluid layer.
A. M. Soward 669

A hydrodynamic analysis of flagellar propulsion. J. J. L. Higdon 685

Large amplitude unsteady motion of a flexible slender propulsor.
J. Katz and D. Weihs 713

The separating flow through a severely constricted symmetric tube.
F. T. Smith 725

Notes on experimental velocity profiles in laminar flow around spheres at intermediate Reynolds numbers. M. N. Esmail, R. L. Hummel and J. W. Smith 755

Buoyancy effects upon lateral dispersion in open-channel flow. Ronald Smith 761

The drag on a sphere moving axially in a long rotating container.
L. M. Hocking, D. W. Moore and I. C. Walton 781

CONTENTS TO VOLUME 91

PART 1 9 MARCH 1979

Evaluation of subgrid-scale models using an accurately simulated turbulent flow. ROBERT A. CLARK, JOEL H. FERZIGER and W. C. REYNOLDS *page* 1

A method for the calculation of the effective transport properties of suspensions of interacting particles. R. W. O'BRIEN 17

A fluid-mechanical study of the closure of heart valves. C. S. F. LEE and L. TALBOT 41

The application of turbulence theory to the formulation of subgrid modelling procedures. D. C. LESLIE and G. L. QUARINI 65

Steady streaming induced between oscillating cylinders. P. W. DUCK and F. T. SMITH 93

Measurements of the growth and structure in plane turbulent mixing layers. N. K. PUI and I. S. GARTSHORE 111

An experimental determination of transition limits in a vertical natural convection flow adjacent to a surface. R. L. MAHAJAN and B. GEBHART 131

Three-dimensional convection in a cubic box of fluid-saturated porous material. JOE M. STRAUS and GERALD SCHUBERT 155

Some effects of surface tension on steep water waves. S. J. HOGAN 167

On the Korteweg–de Vries equation for a gradually varying channel. JOHN W. MILES 181

On surface drift currents in the ocean. NORDEN E. HUANG 191

PART 2 23 MARCH 1979

Attenuation of sound in a low Mach number nozzle flow. M. S. HOWE 209

Thermoelectric magnetohydrodynamics. J. A. SHERCLIFF 231

Two-dimensional analyses related to wave-energy extraction by submerged resonant ducts. JAMES LIGHTHILL 253

Instabilities of convection rolls in a fluid of moderate Prandtl number. F. H. BUSSE and R. M. CLEVER 319

The relative diffusion of a cloud of passive contaminant in incompressible turbulent flow. P. C. CHATWIN and PAUL J. SULLIVAN 337

The linearized treatment of general forced gas oscillations in tubes. PETER A. MONKEWITZ 357

REVIEWS

Natural Convection from Combustion Scources, by M. P. Murgai page 398
Similarity Analysis in Fire Research, by M. P. Murgai 398
Mechanics of Fluids, by N. S. Govinda Rao 399
Mathematische Methoden der Strömungsmechanik, by Wilhelm Schneider 399
Problems of Stellar Convection, edited by E. A. Speigel and J. P. Zahn 340

PART 3 11 APRIL 1979

Steady long slender droplets in two-dimensional straining motion. E. J. HINCH and A. ACRIVOS 401

On the structure of inertial waves produced by an obstacle in a deep, rotating container. K. STEWARTSON and H. K. CHENG 415

Three-dimensional numerical integrations of the Navier-Stokes equations for flow over surface mounted obstacles. P. J. MASON and R. I. SYKES 433

Experiments on convective layer formation and merging in a differentially heated slot. R. A. WIRTZ and C. S. REDDY 451

The ray theory of ship waves and the class of streamlined ships. JOSEPH B. KELLER 465

Note on Howard's semicircle theorem. G. T. KOCHAR and R. K. JAIN 489

Separation from spherical caps in Stokes flow. R. COLLINS 493

Unsteady flow in straight alluvial streams: modification of individual dunes. JØRGEN FREDSØE 497

Inequalities and variational principles for turbulent transport. MELVIN E. STERN 513

Development of the flow field on a point force in an infinite fluid. C. SOZOU 541

On Rayleigh's criterion for slowly varying flows. GIOVANNI SEMINARA 547

Magnetohydrodynamic flows and turbulence: a report on the Second Bat-Sheva Seminar. H. HANOVER, J. C. R. HUNT, M. R. E. PROCTOR and E. S. PIERSON 563

A numerical comparison of velocity-based and strain-based Lagrangian-history turbulence approximations. JACKSON R. HERRING and ROBERT H. KRAICHNAN 581

REVIEWS

Progress in Numerical Fluid Dynamics, edited by H. J. Wirz 599
Proceedings of the Fifth International Conference on Numerical Methods in Fluid Dynamics, edited by A. I. van de Vooren and P. J. Zandbergen 599
Numerical Methods in Fluid Dynamics, by Maurice Holt 600

PART 4 27 APRIL 1979

Scattering and distortion of the unsteady motion on transversely sheared mean flows. M. E. GOLDSTEIN *page* 601

Effects of small streamline curvature on turbulent duct flow. I. A. HUNT and P. N. JOUBERT 633

Pressure-fluctuation measurements on an oscillating circular cylinder. P. W. BEARMAN and I. G. CURRIE 661

Ionizing argon boundary layers. Part 2. Shock-tube side-wall boundary-layer flows. W. S. LIU and I. I. GLASS 679

A vortex theory of animal flight. Part 1. The vortex wake of a hovering animal. J. M. V. RAYNER 697

A vortex theory of animal flight. Part 2. The forward flight of birds. J. M. V. RAYNER 731

Turbulent buoyant convection from a source in a confined region. P. C. MANINS 765

CONTENTS TO VOLUME 93

PART 1 12 JULY 1979

Measurements in subsonic and supersonic free jets using a laser velocimeter. JARK C. LAU, PHILIP J. MORRIS and MICHAEL J. FISHER *page* 1

The effect of temperature-induced variations in charge carrier mobility on a stationary electrohydrodynamic instability. W. J. WORRAKER and A. T. RICHARDSON 29

Experiments on the Weis–Fogh mechanism of lift generation by insects in hovering flight. Part 1. Dynamics of the 'fling'. T. MAXWORTHY 47

Overstability and inverted bifurcation in homeotropic nematics heated from below. E. GUYON, P. PIERANSKI and J. SALAN 65

On the elimination of refractive-index variations in turbulent density-stratified liquid flows. TREVOR J. MCDOUGALL 83

Slender streams. JAMES GEER and JOSEPH B. KELLER 97

Exact solutions of a three-dimensional nonlinear Schrödinger equation applied to gravity waves. W. H. HUI and J. HAMILTON 117

Instability and turbulence in a stratified fluid with shear. C. G. KOOP and F. K. BROWAND 135

An experimental and numerical study of the secular spin-up of a thermally stratified rotating fluid. ROBERT C. BEARDSLEY, KIM D. SAUNDERS, ALEX C. WARN-VARNAS and JOHN M. HARDING 161

Large-scale coherent structures in the wake of axisymmetric bodies. H. V. FUCHS, E. MERCKER and U. MICHEL 185

PART 2 26 JULY 1979

Turbulence generated by the interaction of entropy fluctuations with non-uniform mean flows. M. E. GOLDSTEIN 209

The influence of relaxation on shock detachment. H. G. HORNUNG and G. H. SMITH 225

Time similarity analysis of unsteady buoyant plumes in neutral surroundings. M. A. DELICHATSIOS 241

The role of rigidity constraints in the rheology of dilute polymer solutions. J. M. RALLISON 279

Shear fluctuations in a turbulent jet shear layer. M. R. DAVIS and P. O. A. L. DAVIES 281

Formation of a viscous boundary layer on the free surface of an imploding rotating liquid cylinder. A. L. Cooper and D. L. Book *page* 305

A three-dimensional analogue of the Prandtl–Batchelor closed streamline theory. P. J. Blennerhassett 319

On the perseverance of a quasi-two-dimensional eddy-structure in a turbulent mixing layer. I. Wygnanski, D. Oster, H. Fiedler and B. Dziomba 325

Asymptotic properties of Burgers turbulence. Shigeo Kida 337

Development of radiation fields and baroclinic eddies in a β-plane. C. L. Tang 379

PART 3 14 AUGUST 1979

Waves in parallel or swirling stratified shear flows. S. Leibovich 401

The organized nature of flow impingement upon a corner. D. Rockwell and C. Knisely 413

Large amplitude progressive interfacial waves. Judith Y. Holyer 433

Sphere drag at Mach numbers from 0·3 to 2·0 at Reynolds numbers approaching 10^7. Donald G. Miller and Allan B. Bailey 449

Experimental study of wall shear rates in the entry region of a curved tube. U. S. Choi, L. Talbot and I. Cornet 165

The high wavenumber instabilities of a Stokes wave. Dieter E. Hasselmann 491

On the application of successive plane strains to grid-generated turbulence. J. N. Gence and J. Mathieu 501

Turbulent Taylor vortex flow. E. L. Koschmeider 515

On the flow around a buoyant cylinder within a rapidly rotating horizontal cylindrical container. Roger F. Gans 529

The inner regions of annular jets. N. W. M. Ko and W. T. Chan 549

Transport processes in dilute gases over the whole range of Knudsen numbers. Part 1. General theory. L. C. Woods 585

PART 4 29 AUGUST 1979

An experimental study of the effects of wall conductivity, non-uniform magnetic fields and variable-area ducts on liquid metal flows at high Hartmann number. Part 1. Ducts with non-conducting walls. Richard J. Holroyd 609

Relaxing wakes behind surface-mounted obstacles in rough wall boundary layers. I. P. Castro 631

Generation of initial wavelets by instability of a coupled shear flow and their evolution to wind waves. SANSHIRO KAWAI *page* 661

Motion of a sphere in the presence of a plane interface. Part 1. An approximate solution by generalization of the method of Lorentz. S. H. LEE, R. S. CHADWICK and L. G. LEAL 705

Double structures of steady streaming in the oscillatory viscous flow over a wavy wall. A. KANEKO and H. HONJI 727

Channel flow with temperature-dependent viscous dissipation. HILARY OCKENDON 737

The unsteady quasi-vortex-lattice method with applications to animal propulsion. C. E. LAN 747

Torsional oscillations of a non-Newtonian fluid with a free surface. T. W. SECOMB and S. ROSENBLAT 767

A simple fluid flow model of ground effect on hovering. JAMES LIGHTHILL 781

CONTENTS TO VOLUME 94

PART 1 11 SEPTEMBER 1979

The round laminar jet in a spherical envelope. W. M. PICKERING and C. SOZOU *page* 1

Energy and momentum integrals for progressive capillary–gravity waves. G. D. CRAPPER 13

Three-dimensional and multicellular steady and unsteady convection in fluid-saturated porous media at high Rayleigh numbers. GERALD SCHUBERT and JOE M. STRAUS 25

Mean flow generation by topographic Rossby waves. ALAIN COLIN DE VERDIERE 39

Sink flow in a rotating basin. C. KRANENBURG 65

Measurements of concentration fluctuations in relative turbulent diffusion. P. C. CHATWIN and PAUL J. SULLIVAN 83

Dynamic instabilities and the transition to chaotic Taylor vortex flow. P. R. FENSTERMACHER, HARRY L. SWINNEY and J. P. GOLLUB 103

A high-order cnoidal wave theory. J. D. FENTON 129

A test field model study of a passive scalar in isotropic turbulence. GARY R. NEWMAN and JACKSON R. HERRING 163

On the evolution of compressive pulses in an exploding atmosphere: initial behaviour. J. F. CLARKE 195

PART 2 25 SEPTEMBER 1979

The effect of short regions of high surface curvature on turbulent boundary layers. A. J. SMITS, S. T. B. YOUNG and P. BRADSHAW 209

The response of a turbulent boundary layer to lateral divergence. A. J. SMITS, J. A. EATON and P. BRADSHAW 243

The almost-highest wave: a simple approximation. M. S. LONGUET-HIGGINS 269

Stability and mixing of a vertical plane buoyant jet in confined depth. GERHARD H. JIRKA and DONALD R. F. HARLEMAN 275

The generation of feeding currents by flagellar motions. J. J. L. HIGDON 305

The hydrodynamics of flagellar propulsion: helical waves. J. J. L. HIGDON 331

On the formation of bubbles in gas-particulate fluidized beds. JEROME B. FANUCCI, NATHAN NESS and RUEY-HOR YEN 355

The effect of a steady drift on the dispersion of a particle in turbulent fluid. A. Nir and L. M. Pismen *page* 369

Turbulent flow and heat transfer in pipes with buoyancy effects. A. M. Abdelmeguid and D. B. Spalding 383

Part 3 16 October 1979

On averaged equations for finite-amplitude water waves. M. Stiassnie and D. H. Peregrine 401

Measurements of turbulence in a zero-mean-shear mixed layer. Trevor J. McDougall 409

Blockage correction with a free surface. Kwang June Bai 433

Marginal instability in Taylor–Couette flows at a very high Taylor number. A. Barcilon, J. Brindley, M. Lessen and F. R. Mobbs 453

The pressure waves produced by the convection of temperature disturbances in high subsonic nozzle flows. A. W. Bloy 465

The dynamics of the head of a gravity current advancing over a horizontal surface. J. E. Simpson and R. E. Britter 477

The trajectories of particles in steep, symmetric gravity waves. M. S. Longuet-Higgins 497

Is the Weis-Fogh principle exploitable in turbomachinery? S. B. Furber and and J. E. Ffowcs Williams 519

Further experiments on transition to Mach reflexion. L. F. Henderson and A. Lozzi 541

Turbulent diffusion and degradation of polymer molecules in a pipe and boundary layer. L. I. Sedov, V. A. Ioselevich, V. N. Pilipenko and N. G. Vasetskaya 561

Streamwise vortices associated with the bursting phenomenon. Ron F. Blackwelder and Helmut Eckelmann 577

A simple model of the mutual interaction of parallel flow and cellular motion in a shear layer applied to the finite amplitude instability of plane Couette flow. J. Steppeler 595

Part 4 29 October 1979

Nonlinear properties of convection rolls in a horizontal layer rotating about a vertical axis. R. M. Clever and F. H. Busse 609

Experimental investigation of the origin of residual disturbances in turbulent MHD flows after laminarization. H. Branover and P. Gershon 629

Experimental investigation of flow and heating in a resonance tube. VIRENDRA SAROHIA and LLOYD H. BACK *page* 649

Conditional sampling study of the turbulent wake of a cylinder. Part 1. GRACIO FABRIS 673

Coriolis-force attenuation of blocking in a stratified flow. M. R. FOSTER 711

The interaction of sound with low Mach number wall turbulence, with application to sound propagation in turbulent pipe flow. M. S. HOWE 729

Local isotropy and large structures in a heated turbulent jet. K. R. SREENIVASAN, R. A. ANTONIA and D. BRITZ 745

Numerical calculations of steady gravity–capillary waves using an integro-differential formulation. JAMES W. ROTTMAN and D. B. OLFE 777

REVIEWS

Elongational Flows: Aspects of the Behavior of Model Viscoelastic Fluid, by C. S. Petrie, 787

Magnetohydrodynamic Flow in Ducts, by H. Branover, 790

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

PROF. H. K. MOFFATT, *School of Mathematics, University of Bristol, Bristol BS8 1TW, England*

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts* 02138, *U.S.A.*

PROF. D. G. CRIGHTON, *Department of Applied Mathematical Studies, University of Leeds, Leeds LS2 9JT England*

PROF. S. H. DAVIS, *Department of Engineering Sciences and Applied Mathematics, Northwestern University, Evanston, Illinois* 60201, *U.S.A.*

PROF. W. C. GRIFFITH, *Mechanical and Aerospace Engineering, North Carolina State University, Raleigh, North Carolina* 27607, *U.S.A.*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, A-025, University of California, La Jolla, California* 92093, *U.S.A.*

PROF. O. M. PHILLIPS, *Department of Earth and Planetary Sciences, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. J. A. SHERCLIFF, *Department of Engineering, University of Warwick, Coventry, Warwickshire CV4 7AL, England*

PROF. J. S. TURNER, *Research School of Earth Sciences, The Australian National University, P.O. Box* 4, *Canberra* 2600, *Australia*

ASSISTANT EDITORS

DR J. C. R. HUNT, DR H. E. HUPPERT, DR D. J. JEFFREY, DR M. E. MCINTYRE, DR D. H. PEREGRINE

EDITORIAL ASSISTANT MRS E. BAKER

Authors wishing to have papers published in the *Journal* should send them to any editor named above, choosing one in their own country if possible. The submission of two or three copies will expedite assessment, although it may not be possible to return all these copies. Original drawings for figures should not be sent until the paper is accepted.

Authors are urged to write their papers clearly and attractively, so that their work will be readily accessible to readers. Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. An author is entitled to 50 offprints of his paper free of charge, and additional offprints can be purchased if ordered when proofs are returned.

COPYING

The *Journal* is registered with the Copyright Clearance Center, P.O. Box 8891, Boston, Mass. 02114. Organizations in the U.S.A. which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright law) subject to payment to C.C.C. of the per-copy fee indicated. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from the Cambridge or New York office of the Cambridge University Press.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS (ISSN 0022-1120) is published in six volumes of four parts. Single parts cost £6.50 net (US $16.50 in the U.S.A. and Canada) plus postage. The subscription price (which includes postage) to volumes 90–95, 1979, is £21.00 per volume (US $52.00 in the U.S.A. and Canada) for institutions; £10.50 (US $26.00) per volume for individuals. Copies of the journal for subscribers in the U.S.A. and Canada are sent by air to New York. Second class postage is paid at New York, N.Y. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

POSTMASTER: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

CONTENTS TO VOLUME 95

PART 1 14 NOVEMBER 1979

Unsteady flow in a collapsible tube subjected to external pressure or body forces. ROGER D. KAMM and ASCHER H. SHAPIRO *page* 1

The diffraction of a planar detonation wave at an abrupt area change. D. H. EDWARDS, G. O. THOMAS and M. A. NETTLETON 79

On the effects of thermally insulating boundaries on geostrophic flows in rapidly rotating gases. FRITZ H. BARK and LENNART S. HULTGREN 97

Numerical solution of the exact equations for capillary–gravity waves. LEONARD W. SCHWARTZ and JEAN-MARC VANDEN-BROECK 119

Reflexion of water waves by a permeable barrier. C. MACASKILL 141

On the parabolic equation method for water-wave propagation. A. C. RADDER 159

Surface pressures and their corrections for the flow past a finite-length plate in supersonic low density flow. S. L. GAI 177

On swimming in a visco-elastic liquid. T. K. CHAUDHURY 189

Experimental study of the instabilities of waves obliquely incident on a beach. R. T. GUZA and D. C. CHAPMAN 199

PART 2 28 NOVEMBER 1979

On the generation of viscous toroidal eddies in a cylinder. J. R. BLAKE 209

Lifting three-dimensional wings in transonic flow. M. S. CRAMER 223

The effects of terrain shape on nonlinear hydrostatic mountain waves. D. K. LILLY and J. B. KLEMP 241

Hydromechanics of low-Reynolds-number flow. Part 5. Motion of a slender torus. ROBERT E. JOHNSON and THEODORE Y. WU 263

An experimental study of liquefaction shock waves. GEORG DETTLEFF, PHILIP A. THOMPSON, GERD E. A. MEIER and HANS-DIETER SPECKMANN 279

Propagation of perturbations in the viscous sublayer and adjacent wall region. HANS-PETER KREPLIN and HELMUT ECKELMANN 305

Surf and run-up on a beach: a uniform bore. S. HIBBERD and D. H. PEREGRINE 323

The laminar horseshoe vortex. C. J. BAKER 347

Mass transfer from a particle suspended in fluid with a steady linear ambient velocity distribution. G. K. BATCHELOR 369

PART 3 11 DECEMBER 1979

On the evolution of a solitary wave in a gradually varying channel. PETER CHANG, W. K. MELVILLE and JOHN W. MILES *page* 401

Low-Reynolds-number motion of particles with two or three perpendicular planes of symmetry. J. B. HARRIS, M. NAWAZ and J. F. T. PITTMAN 415

On heating a stable salinity gradient from below. HERBERT E. HUPPERT and P. F. LINDEN 430

Trapped waves in the neighbourhood of a sonic-type singularity. RENUKA RAVINDRAN 465

Natural convection in thermally stratified enclosures with localized heating from below. K. E. TORRANCE 477

Steady flow between a rotating circular cylinder and fixed square cylinder. E. LEWIS 497

Flow patterns of large eddies in a wake and in a boundary layer. A. A. TOWNSEND 515

On the interpretation of dynamic contact angles in capillaries. FRED Y. KAFKA and E. B. DUSSAN V. 539

Simple theoretical and experimental study of convection with some geophysical applications and analogies. G. S. GOLITSYN 567

PART 4 27 DECEMBER 1979

Mathematical modelling of three-dimensional heated surface jets. J. J. MCGUIRK and W. RODI 609

Viscous flow through unsteady symmetric channels. P. W. DUCK 635

The representation of the viscous wall region by a regular eddy pattern. DIMITRIOS T. HATZIAVRAMIDIS and THOMAS J. HANRATTY 655

On the normal modes of parallel flow of inviscid stratified fluid. Part 2. Unbounded flow with propagation at infinity. P. G. DRAZIN, M. B. ZATURSKA and W. H. H. BANKS 681

A note on numerical computations of large amplitude standing waves. PHILIP G. SAFFMAN and HENRY C. YUEN 707

The submerged sphere as an absorber of wave power. M. A. SROKOSZ 717

Flow of elastic compressible spheres in tubes. HÜSNÜ TÖZEREN and RICHARD SKALAK 743

Heat transfer in transient and unsteady flows past a heated circular cylinder in the range $1 \leqslant R \leqslant 40$. C. J. APELT and M. A. LEDWICH 761

Convective instability of self-similar spherical expansion into a vacuum. D. L. Book *page* 779
